| Understanding the world |
| Describe their immediate environment, using knowledge frexts and maps Know some similarities and differences between different their experiences and what has been read in class Explain some similarities and differences between life in the knowledge from stories, non-fiction texts and – where app Explore the natural world around them, making observation Know some similarities between the natural world around their experience and what has been read in class Understand some important processes and changes in the and changing states of matter Expressive Arts and Design Use a variety of materials to create their own representation Tell stories based on the world around them Uiteracy Practice writing geographical terms Write sentences based on pictures from around the world |
| |

Key Stage One

| | | Year 1 | |
|-----------------------|--|--|--|
| Substantive Knowledge | What makes Northumberland Heath special? Recognise that Northumberland Heath is located in London, the capital city of the United Kingdom. Identify Northumberland Heath's position on a simple map of the local area or a map of London. Understand the basic physical features of Northumberland Heath, such as the presence of the River Thames nearby. Discover green spaces within Northumberland Heath, such as parks and nature reserves. Learn about the types of housing and buildings found in Northumberland Heath, distinguishing between residential and commercial areas. Discuss the communities and some of the local services that people in Northumberland Heath use (e.g., schools, shops, and health services). Explore how the local environment in Northumberland Heath is taken care of, looking at aspects such as litter, recycling, and community projects. | What can we learn from maps? Identify and name the four countries that make up the United Kingdom and their capital cities, and the surrounding seas. Locate on a map the countries of the United Kingdom and their capital cities. Identify the national flags of each country and discuss the Saint Andrew's Cross, Saint George's Cross, and Saint Patrick's Cross, which combine to form the Union Jack. Use basic geographical vocabulary to describe key human features, including city, town, village, farm, house, office, port, harbour, and shop. Identify and comment on the physical features of their own school and its grounds and the key human and physical features of its surrounding environment. Know directional vocabulary – left, right, forward and backwards | What effects do the cl Demonstrate a k United Kingdom place to place. Describe the sea physical landsca countries. changes in weather have around the world?

a basic understanding of the weather patterns in the om and wider world and how these can vary from

seasonal changes and how the weather affects the scape of the United Kingdom and specified world

nd cold areas of the world in relation to the equator.

| | | Year 2 | |
|-----------------------|---|---|--|
| Substantive Knowledge | What makes London and the United Kingdom unique? Recognise the physical features of their nearest capital city, London. Describe the human features of London, including buildings, jobs, the local community, and transport. Begin to understand the difference between the UK, Great Britain, and the British Isles, using correct geographical terminology. Identify contrasting features between each of the 4 countries. Understand simple compass directions (North, South, East, and West) and use them to locate features and routes on a map. | How does the weather shape our environment? Use basic geographical vocabulary to refer to key physical features, including: beach, cliff, coast, forest, hill, mountain, sea, ocean, valley, and weather. Develop their understanding of the physical and human features of each continent (For example, associating Africa with the Sahara Desert and Europe with capital cities like London and Paris). | What can we discover to ours? Compare two confeatures. Understand the orthe contrasting r Recognise how the festivals, tradition |

Key Stage Two

| | | Year 3 | |
|-----------------------|---|---|--|
| | What makes someone a hero in our community? | Why Do Natural Disasters Happen in Certain Parts of the World? | Why is Spain a pop |
| Substantive Knowledge | • Understand the types of settlement and land use This unit contains a significant amount of disciplinary knowledge. | Know what a volcano is, including the components such as the magma chamber, vent, crater, and lava. Understand the difference between an active, dormant, and extinct volcano. Describe how earthquakes occur, explaining the concept of tectonic plates, faults, and the release of energy through seismic waves. Identify regions globally that are prone to volcanoes and earthquakes Know the immediate and long-term effects of volcanoes and earthquakes. Identify the position and significance of latitude, longitude, equator, northern and southern hemispheres and the Tropics of Cancer and Capricorn. | Identify the location in E Describe may mountain ra Understand the climate of Discuss majo Identify key including lar Understand the rol |

opular destination?

- ne UK and Spain on a world map, highlighting their n Europe.
- major physical features of both countries, such as ranges, rivers, and coasts.
- nd the difference between the climate of the UK and e of Spain.
- ajor cities in both countries
- ey aspects of cultural heritage in the UK and Spain,
- language, festivals, and national holidays.
- role of tourism on the economies of both countries

| | | Year 4 | |
|-----------------------|--|---|---|
| | Why are rivers important to humans? Explain what a river is and understand the basic parts of a | Should the earth's resources be shared equally? Identify routes to the UK using different transportation methods from | • Define what |
| Substantive Knowledge | river including the source, course (upper, middle, lower), and mouth. Identify and describe key river features such as tributaries, meanders, oxbow lakes, deltas, and floodplains. Describe the stages of the water cycle, including evaporation, condensation, precipitation, and collection, particularly focusing on how it relates to river formation. Discuss processes such as erosion, transportation, and deposition in the context of how rivers shape the landscape. Understand how humans use rivers for activities such as irrigation, transportation, and as a water supply, and discuss the importance of rivers to communities. Identify and discuss the impact of human activity on rivers, including pollution and river management strategies like damming and rerouting. Recognise and name major world rivers such as the Nile, Amazon, and Yangtze, and locate them on a world map. Identify environmental concerns associated with rivers, including pollution and the effects of climate change on river ecosystems. Discuss simple conservation strategies that can help protect and preserve river environments. | Europe, North and South America • Recognise the significance of the environment on human life and discuss the importance of sustainable management of the Earth's resources. | as villages, to that differen • Understand discussing fa location, and Recognise how economic oppor |

| | | Year 5 | |
|-----------------------|--|--|--|
| Substantive Knowledge | Why makes the Poler regions unique? Locate the Poles and describe their position relative to the other continents and the surrounding oceans. Describe the key physical features of the Poles. Understand the characteristics of their climate, identifying them as the coldest, windiest, and driest continent. Understand the composition and scale of the Poles. Describe the purpose and impact of human activities in Antarctica, particularly the research conducted at various international stations. | Why does Earth need rainforests? Define what a rainforest is, including the different types (tropical and temperate), and describe their key features. Know where major rainforests are located around the world, including the Amazon, Congo, and Southeast Asian rainforests, and be able to identify them on a map. Know the specific climatic conditions of rainforests, such as high rainfall and year-round warm temperatures. Know common plants and animals found in rainforests and | How can we help to Define sustations significance maintaining health of the Understand including clivic reasons why Describe severe |
| Subst | | understand their adaptations to the rainforest environment. Understand human activities that threaten rainforests, like deforestation, and their impacts on biodiversity and the environment. Know about global and local conservation efforts and strategies to protect rainforests. | using renew sustainable • Understand unsustainab and globally |
